WiFi stops working every couple hours  
2020/05/18

So, I got new WiFi, and it has stopped working every couple hours. Well, either that or it is like 200 kbps, when it is advertised as 1-5 gbps. Sometimes it works as advertised, but usually it doesn't. I got a new router, but I still have the same problem. Sometimes restarting the router or unplugging and reconnecting the Ethernet cable works, other times I can't do anything but wait until it starts working again. The past couple days its has been extremely slow. I also noticed that certain games on my phone, like PUBG Mobile, don't work with my WiFi. It doesn't load, even if the WiFi works with everything else. I try the same game with different WiFi, and it works. Any tips or advice on what to do is appreciated. Thanks in advance!
